

# RANCHTECH® BLADES

What makes our aerator penetrate the hardest soils?  
 What makes our aerator fracture soils deeper?  
 What makes our aerator produce higher yields?

## RanchTech Blades®!

## THE RANCHTECH BLADE® ADVANTAGE

The new RanchTech 6" blades have a beveled and tapered edge that sharpens with use. This new forged alloy gives the blades a 35,000+ acre lifespan.

The RanchWorx Advantage comes from the wide sharp blades and spiral design. This design allows for the weight of the unit to cut, not tear, the root system. Since the blades are truly no-till, the plants will respond quickly and favorably.

RanchTech Blades®, combined with a RanchWorx signature aerator, allow maximum utilization of the increased water, fertilizer, and nutrient infiltration to the roots of the plant.

**THERE IS NO BETTER WAY TO AERATE  
THAN WITH RANCHTECH BLADES®**

## LIFETIME WARRANTY

AGAINST BREAKAGE ON RANCHTECH BLADES®

Upgrade to 8" RanchTech Pasture Blades from 6" (Standard)

7" RanchTech® Turf Blades instead of 6" RanchTech Pasture Blades (New Purchase Only)

Removable Drawbar for all single drum units. Great for pulling a harrow.

# PRODUCT OPTIONS

## BROADCAST & SEEDING

A Class II 3-point hitch connection to the aerator on our hydraulic spreaders offer increased versatility for use behind other tractors with available 3-point hitch connections. For even further accuracy of seed placement, ask your sales rep about drop seeder options!

Outfit your aerator to include a hydraulic spreader to spread seed or fertilizer as you aerate. Great for supplemental seeding or applying granular fertilizer as required.

•Hydraulic Spreader Package  
3-Point Mount, 9.6 Bushel Hopper  
(For 30-36 SC & DA)

•Hydraulic Spreader Package  
3-Point Mount, 16 Bushel Hopper  
(For 36 SC & DA)

•HD Hydraulic Spreader Package  
3-Point Mount, 32 Bushel Hopper  
(For DA)

•10 Drop Seeder Package  
1,000 pounds of capacity  
30 Diamond-shaped openings,  
4-inches apart

•12 Drop Seeder Package  
1,200 pounds of capacity  
36 Diamond-shaped openings,  
4-inches apart

## CYLINDER STOP OPTION

This assembly is designed to catch the aerators in the event of a hydraulic failure (such as a cylinder or hose failure), offering added reliability and peace of mind. The stop can be easily “flipped” up for transport and simply lowered and left in place when not needed.

## LIGHT KIT OPTION

The new 2026 light kit provides a full, factory-ready lighting solution with tail/brake lights, turn signals and hazard lights, and marker lights—designed to enhance visibility, safety, and road compliance.

## REAR DRAWBAR HITCHES

HD struted rear hitch on Tandem drum aerators. Great for pulling a harrow or a no-till seed drill.

Get the most for every pass with your RanchWorx Aerator by pulling additional implements while aerating. Available on all RanchWorx Aerators are hitch options capable of towing a variety of implements such as the RanchWorx HD Land Rollers, harrows, or sprayers. The savings associated with eliminating multiple passes will make your RanchWorx Aerator investment pay you back with exponential tonnage and production gains from your fields.
